

Phase 03:

Web Site Elements

- One of the pages should contain a table with tabular data. The background color of the rows should have alternating colors.
- One of the pages should contain a form.
 - Set method to post
 - Set action to: <http://www.grtscott.net/formhandler.php>
 - All elements must have the name attribute set
 - All elements except the dropdown list (select and option elements) will require the id to be set with unique values
 - At least three Text boxes
 - A radio list with at least three choices
 - A checkbox list with at least three choices
 - A textarea element
 - A select element with at least three options (drop down list)
 - An email input element
 - A tel input element
 - A number input element
 - A submit button
 - Use the label tag with the for attribute set on elements except the dropdown list and submit button (see page 688 in second edition of the text for details)
 - Use fieldset and legend tags to break your form up into logical sections
 - Use the required attribute on at least one textbox
 - Use the placeholder attribute on all textboxes and the textarea element

CSS

- Tables: alternating row colors
- CSS must validate (<http://jigsaw.w3.org/css-validator/>)

FTP and Blackboard Submission

- Submit the zip file of the completed project to blackboard.
- Upload the completed project to the “project” folder on the FTP site you were assigned (replace the previously uploaded files).
